**Revision**

Aya Akl - some more adjustments needed- it's close : Link adjusted lab coat (including pockets and collar), the eyes and line on her face to match other characters in the show. For the stethoscope make it slightly longer and have the badges (marked in green) on it remove these Link.

Since dr fox doesn't use the stethoscope in the script, no need to scale it to her huge ears, it'll look too big sitting on her shoulders.
